

ADVISORY NEIGHBORHOOD COMMISSION 6B
EMCAC Report
for
March 23, 2019

The March 23 meeting of the EMCAC considered the familiar agenda items: manager's report, recent testimony, extreme concerns regarding the air-conditioning problems in advance of the summer season and plans for management of the 300 block of 7th street.

Most noteworthy with regard to EMCAC, however, is that in concert with John Stokes, the Interim Associate Director of External Affairs at DGS, a series of in-depth meetings to explore perennial market issues have been arranged. The first meeting was devoted to marketing and the meeting on April 12 will focus on developing the RFP intended to prepare a strategic plan for the market. A third meeting has been scheduled to focus on parking issues.

The meetings are a departure from the ongoing monthly meetings in part because of the luxury of considering a single important issue and in part because of the active engagement of DGS.
